The Besen Group

Tool Brochure

Tools Overview

We developed mobile industry's first state-of-the-art business case tools and total cost ownership (TCO) tools for private LTE networks, private 5G networks and neutral host networks in order to demonstrate the economics benefits of these networks to enterprises.

We believe that enterprises need to have a solid understanding of the opportunity cost of these networks when making their decisions.

The Besen Group offers each tool on a corporate license basis. The license fee includes one hour telephone consultation with the analyst to explain the methodology, assumptions and inputs.

The Besen Group can also develop customized business case tools or total cost of ownership tools based on its client requirements and use cases.

For any questions or license pricing information, please contact us at tool@thebesengroup.com.
